

# RYGR HULDR DDH NEIPA

---

A sily smooth and rich NEIPA. Double dry-hopped with fresh Citra and Mosaic hops from Yakima, USA. Hopped the same day as it is bottled. Aroma of citrus and tropical fruits, low on haze due to clean fusion and separator. 100% Jærsk malt base.

Say hello to our new Norwegian partner and brewery: RYGR

Rygene - The grain farmers who built Rogaland. They were a population that in the ages of Vikings lived in the southwest, primarily in Rogland. Rygr has chosen 872 as "their" number, because this is traditionally considered the year for the sale of Hafrsjord. It is therefore perhaps not surprising that when Jæren's next largest brewery is established, it happen in the middle of the grain fields and pioneers on Jæren, at close quarters with Lalandsholmens in Frøylandsvatnet, where the legend tells that Olav Tryggvasson Hårfagre's direct descendant was born.
